DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no support in the specification for the springs.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,099,626 to SEEGER. SEEGER discloses the use of a connector including baseplate (B), a tab (18,20) extending from a first major face thereof, an attachment structure (38) extending from a second major face, and a first spring (36) which extends from the second major face via element (22). In reference to claim 11, SEEGER also includes a second spring (36) on another side of element (22).

Allowable Subject Matter

Claims 1-9 and 17-23 are allowed.

Claims 12-16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
